Seasonal space heating energy efficiency class of package

Seasonal space heating energy efficiency under colder and warmer conditions

Colder: 138,02 - 133,00 = 5 %

Warmer: 138,02 + -133,00 = 5 %

The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a buildings, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.

Water heating energy efficiency under colder and warmer climate conditions

Colder:  $375 - 0.2 \times 276,7 = 319 \%$

Warmer:  $375 + 0.4 \times 276,7 = 485 \%$

The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a buildings, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.
